DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14, 16-18, 28-30 and 32-41 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or fairly suggest a system for decoding a series of encoded binary digital signals using a data structure, the data structure having multiple base indices and multiple base codes comprising selecting N encoded binary digital signals, N being a value comprising the same number of bits as the number of bits comprising an extreme length code word in the data structure; and comparing the N encoded binary digital signals with two or more entries from the data structure at the same time as called for in claim 1, 34 and 38; selecting a set of N encoded binary digital signals, N being a value at least as great in length as an associated base code, wherein a set of N encoded binary digital signals is selected for substantially each base code in an associated data structure; and comparing one or more the sets of N encoded binary digital signals with the associated base codes at substantially the same time as called for in claim 9; a data structure of code words, the code words being arranged in sub groupings wherein the reference code comprises the base code of the corresponding set of code words, wherein the base code comprises a length substantially equal to the length of an extreme length base code for a given set of code words as called for in claim 28; wherein the base index comprises the number of individual Huffman codes that are contained within a given set of Huffman code words as called for in claim 29; wherein the base index is equal to the value (- 1) in the corresponding set of Huffman values if there are no corresponding Huffman codes of the corresponding

Art Unit: 2819

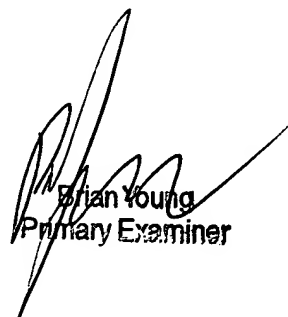

length as called for in claim 30; determining a base index for at least one sub-grouping of code words, wherein the base index comprises the lexicographically consecutive position of the first code word of a given sub grouping within the entire set of code words as called for in claim 32; determining a base code for at least one sub grouping of code words, wherein the base code comprises the lexicographically first code word in a given sub grouping within the entire set of code words as called for in claim 33. Therefore, claims 1-14, 16-18, 28-30 and 32-41 are allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
